ADIL DEOKAR

Software Developer | AI Engineer | Cloud & Distributed Systems
Pune, India • deokaradil@gmail.com • +91 7028690073 • adildeokar.com • GitHub • LinkedIn

EDUCATION

MIT Art, Design & Technology University, Pune *Jun 2023 – Present*
B.Tech (Expected 2027) • CGPA: 8.75 / 10 • Management Lead, Ideate • TEDx MITADT Team • Tech Team, CodeChef

Rajiv Gandhi Jr College *Jun 2021 – May 2023*
Grade: 71.33% • SAT: 94th percentile • National-Level Basketball (Maharashtra) • State-Level Rifle Shooter (Pune)

Bishops School, Pune *Jun 2013 – May 2021*
Grade: 92% • SAT: 1350 • House Captain • 3× Best Basketball Player Award • School Team Captain (Basketball, Badminton, Volleyball & Cricket)

SKILLS

Languages: Java, C++, Python, C#, JavaScript, SQL
CS Fundamentals: Data Structures, Algorithms, OOP / OOD, Operating Systems, DBMS, Complexity Analysis
AI / ML: Multi-Agent Systems, GenAI, LLMs & Prompt Engineering, Federated Learning, Deep Learning, MLOps, Edge AI
Cloud & DevOps: AWS, Azure (App Service, Static Web Apps, PostgreSQL), Docker, GitHub Actions CI/CD, Monitoring
Web & Design: React, Next.js, Three.js, REST APIs, WebSockets, UI/UX, Framer, Adobe Suite, WordPress

INTERNSHIPS

Software Development Intern - Whirlpool Corporation *Aug 2026 – Nov 2026*
- On the AI & Automation team, designing AI-driven solutions that automate internal engineering workflows
- Developing features for a cross-platform iOS/Android app with the core development team in an agile workflow
- Turning the manual test suite into an automated end-to-end regression framework, cutting release cycle time

Software Development and AI Intern - Monkstack Solutions LLP *Feb 2026 – July 2026*
- Shipped production Next.js/React full-stack apps and an interactive Three.js 3D app for an onboarded client
- Integrated an Azure PostgreSQL relational backend, designing the schemas and APIs behind client-facing features
- Owned deployments on Azure App Service & Static Web Apps, with Docker and automated GitHub Actions CI/CD

Founder & Lead Developer - DKC DevKnight Technologies Pvt Ltd *Oct 2025 – Feb 2026*
- Architected scalable AI systems and automation frameworks, taking broadly defined problems to shipped products
- Led development of AI agents and backend infrastructure, optimizing performance for fast, reliable code

Lead Tech & AI - Hayy Media Pvt Ltd *Oct 2024 – Oct 2025*
- Led end-to-end development and launch of HayyAI, a live AI SaaS product, owning system architecture, model integration, and production rollout
- Built CI/CD pipelines with logging, metrics, and error monitoring, enabling weekly releases without regressions
- Designed user-first workflows that let non-technical teams go from idea to AI-generated output in minutes; coordinated cross-functional delivery across content, design, and ops

SDE Intern - SoftTech Engineers Ltd. *Jun 2024 – Aug 2024*
- Shipped enhancements to live, customer-facing software products, including new file export functionality
- Built a secure, password-protected PDF viewer that reduced manual document-handling time for client users

AWARDS & PROFESSIONAL TITLES

- **Winner** - Smart India Hackathon 2024 (National) | **Winner** - IEEE INNOVATEX 2026 | **Winner** - Innovation2k25, College of Engineering Phaltan
- 2nd Runner-Up - We Pitch, MIT ADTU Pune | IBM Certified: **AI Product Manager** | Google Cloud: **Generative AI Leader** | AWS Data Engineer – Associate (DEA-C01, in preparation)

CERTIFICATIONS

AWS (5): Application Integration & Networking • Data Analytics • Databases • Security, Governance & Compliance • Storage
IBM (10): Product Management: Foundations & Stakeholder Collaboration • Initial Product Strategy & Plan • Product Management: An Introduction • Building AI-Powered Products • Supercharge Your PM Career with Gen AI • Generative AI: Foundation Models & Platforms • Generative AI: Introduction & Applications • Generative AI: Prompt Engineering Basics • Introduction to Artificial Intelligence • Python for Data Science, AI & Development
Google Cloud (4): Gen AI: Unlock Foundational Concepts • Gen AI: Navigate the Landscape • Gen AI: Beyond the Chatbot • Gen AI Apps: Transform Your Work
Other (1): University of Pennsylvania - Computational Thinking for Problem Solving

PROJECTS

Krew - Multi-Agent AI Organization *National Hackathon Winner | 700+ teams*

- Architected Krew, a manager-led multi-agent system in which specialized AI agents collaborate, critique, and hand off tasks, producing higher-quality outputs than single-agent baselines
- Enforced structured collaboration through defined agent roles, goals, and backstories, with end-to-end tracing and guardrails that reduce hallucinations and keep workflows reliable
- Delivered a production-ready orchestration layer supporting parallel and sequential pipelines, tool integrations, and observability for repeatable, end-to-end execution

Clause AI - Legal Multi-Agentic System

- Built an AI-driven contract analysis platform on a multi-agent architecture that detects risk, bias, and ambiguity, surfacing actionable insights for data-backed negotiations
- Designed a contextual intelligence layer that adapts drafting and review to each company's voice and risk profile, keeping legal outputs consistent at scale
- Implemented simulation and benchmarking modules that stress-test clauses against industry patterns, strengthening contract resilience and decision quality

SIH 2025 - Rake Optima *90–95% wagon utilization • ~30% logistics cost reduction*

- Engineered a cloud-native optimization engine combining demand forecasting, material-to-rake matching, and multi-objective optimization to generate end-to-end rake plans in minutes, with disruption-aware re-optimization
- Achieved 90–95% wagon utilization and ~30% logistics cost reduction by unifying route planning, loading sequencing, and dispatch scheduling into one real-time decision-support workflow

AI Crowd Flow Analytical System - Jetson Orin

- Built an edge AI system on NVIDIA Jetson Orin for real-time crowd counting, flow analytics, and congestion alerts across multi-camera streams, optimized for low-latency on-device inference
- Delivered privacy-preserving, scalable deployments with density heatmaps, occupancy thresholds, and operational dashboards that guide staffing, routing, and safety response in high-traffic zones

FedMed - Federated Learning for Healthcare Time Series

- Built an end-to-end distributed ML platform supporting centralized, distributed, and federated training on healthcare time-series data, with a Python backend and React frontend
- Developed real-time WebSocket monitoring that visualizes training progress, model metrics, client status, and system topology across nodes through interactive dashboards
- Implemented evaluation analytics (confusion matrices, throughput/latency trends, model comparison) enabling faster experimentation and data-driven model selection

Anti-Proxy Attendance System *SIH 2024 Winner*

- Built an open-source Raspberry Pi biometric attendance system with R307 fingerprint verification that eliminates proxy attendance and produces auditable, CSV/Excel-ready records
- Designed faculty-controlled sessions with authenticated start/stop flows and PIN-secured closure for reliable, tamper-resistant classroom operations
- Standardized UART-based Python integration using Adafruit libraries for reproducibility on commodity hardware, enabling easy forks and campus-scale deployment

HOBBIES

- Basketball - National
- Chess - District
- Event Management
- Offroading Trails
- Mountain Biking
- Rifle Shooting - State
